## Syphon

### Description

Pressure gauge syphons are intended to protect the pressure gauge from the effect of hot pressure media such as steam and also to reduce the effect to rapid pressure surges.

Condensate of the pressure medium that is collected inside the coiled or U-Shaped portion of the syphon prevents direct contact. When first installed the syphon should be filled with water or any other suitable separating liquid.

### Features

- Variety of process connection
- Variety of sizes to suit the application
- Different type of selections for suit the technical Requirements

### Application

- Petroleum industries
- Thermal / Nuclear / Hydro Power Stations
- Iron and Steel Industries
- Steam boilers, Stem traps & Etc.,
- Chemical process industries.
